**Brahman Schedule O Form****Complete for Females in Embryo Programs**

Each flushing must be completed whether it results in the production of embryos / calves or not, since the Donor female's ICP will be compromised if not recorded. Once fertilization of the Ova had been achieved, please specify how it was done. When embryos are transferred, it is very important to also submit the recipient female's information, as her breed and age is used in the Society's Performance Evaluation.
